

Akincilar, Semih C.		
Quantitative assessment of telomerase components in cancer cells		40
Amagase, Yoko		
NADE as a novel precancerous marker in the rat liver		41
Ardabili, Sara		
Back to the roots: Embryonic and neural stem cell markers are expressed in human neuro-ectodermal tumours		42
Arfuso, Frank		
Targeting cancer stem cells using secreted frizzled-related protein4 peptides		43
Ascolani, Gianluca	Presenters: Gianluca Ascolani, Pietro Liò	
Circulating tumour stem cells: a model from breast cancer to bone metastasis		44
Ayyash, Muneef		
CK1d/e- mediated Wnt signalling is indispensable for intestinal stem cell maintenance		45
Baumgartner, Christian		
MEK1 as a critical modulator of hematopoietic stem cell activity		46
Bellutti, Florian		
CDK4 and CDK6 cooperate in counteracting the INK4 family of inhibitors during murine leukemogenesis		47
Boccellato, Francesco		
Establishment of an <i>in vitro</i> infection model of <i>H. pylori</i> using human primary gastric epithelial cells		48
Bonetti, Paola		
A p53-miRNA axis regulates the commitment of mammary stem cells/progenitors toward differentiation		49
Borys, Agnieszka	Presenters: Julita Machlowska, Agnieszka Borys	
Isolation of colorectal cancer stem cells from cancer cell line and generation of organoids from thereof		50

Boukamp, Petra	
Tumour heterogeneity versus tumour stem cells in human cutaneous squamous cell carcinomas (cSCC)	51
Brown, Daniel V.	
Coexpression analysis of CD133 and CD44 identifies proneural and mesenchymal subtypes of glioblastoma multiforme	52
Centanin, Lazaro	
Life long memory of stem cell division rates <i>in vivo</i>	53
Chandaria, Rehma	
The effect of stem cell marker Lgr5 in colon cancer	54
Charni, Meital	
The role of p53 in liver homeostasis	55
Chaves-Pérez, Almudena	
URI In Intestinal homeostasis	56
Chen, Chun-Ming	
Pten haplo-insufficiency promotes microRNA-122 null hepatocellular carcinogenesis through expansion of hepatic tumour-initiating cells	57
Ciechomska, Iwona	
The effect of BIX01294, an inhibitor of histone methyltransferase, on the outcome of autophagy in glioblastoma initiating cells	58
Cinelli, Paolo	
Pramel7 mediated degradation of UHRF1 by the ubiquitin proteasome system regulates epigenetic remodeling in stem cells	59
Close, Pierre J.	
Elongator promotes breast cancer metastasis	60
Conder, Ryan K.	
Efficient establishment and long-term maintenance of 3-dimensional mouse intestinal organoids using a novel defined and serum-free medium	61

Cortez, Eliane PDGF-D maintains tumour cell heterogeneity in an experimental model of pancreatic neuroendocrine tumours	62
da Silva-Diz, Victoria Cancer stem cell features change at late stages of carcinoma progression to promote tumour growth and metastasis	63
Daniel, Paul A pathway specific role for the transcription factor Cyclic-AMP Response Element Binding (CREB) in Glioblastoma Multiforme	64
Davis, Alexandra M. Role of the viral oncogene, latent membrane protein 1 (LMP1) in the induction of myofibroblasts in nasopharyngeal carcinoma	65
de Barrios, Oriol Stemness-promoter ZEB1 factor modulates expression of CDX1 and CDX2 caudal homeobox genes in colorectal carcinoma cells	66
Delaunay, Sylvain Elongator promotes breast cancer metastasis	67
Demidova (Goloudina), Anastasia Wip1 stress phosphatase differently affects the fate of hematopoietic stem and differentiated cells after DNA damage	68
Dirkse, Anne Adaptation capacities of cancer stem cells in glioblastoma	69
Doma, Eszter The role of JAK2 in haematopoietic stem cells (HSCs)	70
Dragoi, Diana Twist1-induced EMT depends on TGF-beta signalling for activation of Zeb1 transcription	71
Duruksu, Gokhan Different response of stromal and mesenchymal stem cells to the extracellular vesicles derived from malign stromal cells and cancer cell lines	72

Englund, Johanna	
Asymmetric cell division and stem cell activity in mammary epithelial cells is regulated by extracellular matrix attachment	73
Er, Ekrem Emrah	
L1CAM driven vascular co-option regulates multiorgan metastasis	74
Espinet, Elisa	
A new Patient Derived Xenograft (PDX) model to study PDAC heterogeneity and its implication in the tumour-stroma crosstalk	75
Fatima, Faria	
Delta32 mutation in CCR5 gene and its association with breast cancer	76
Frommel, Sandra C.	
BAZ2A (TIP5) is involved in epigenetic alterations in prostate cancer and its overexpression predicts disease recurrence	77
Galan-Martinez, Javier	
TCFL5 expression changes during Multicellular Tumour Spheroids (MCTS) formation	78
Gao, Xuefeng	
Radiation-induced reprogramming of senescent mammary epithelial cells enriches CD44+/CD24low/- putative stem cell populations	79
Ghuwalewala, Sangeeta	
Role of miR-146a in regulating stemness of oral squamous cell carcinoma	80
Golebiewska, Anna	
Glioblastoma heterogeneity at the genetic and phenotypic level – is there a role for cancer stem cells?	81
Goltsev, Anatoliy	
Effect of number of freeze-thaw cycles on character of change in Ehrlich carcinoma stem-like cells	82
Gonzalez Meljem, Jose Mario	
Adamantinomatous craniopharyngioma contains senescent cells with tumour-inducing potential	83

Gottschalk, Andrea	
Mathematical modeling of bone marrow failure and accelerated aging of hematopoietic stem cells in Fanconi anemia	84
Greulich, Philip	
Robust cell fate balance through reversible differentiation in normal tissue	85
Grundschober, Eva	
Deletion of Jak2 accelerates BCR-ABL induced leukemia	86
Grundström, Thomas	
Signal regulated localisation of a mutagenic protein complex at the Igh locus	87
Gupta, Samir	
Somatic regulation of germ-cell proliferation in <i>Drosophila</i> testis: Roles of EGFR downstream signalling	88
He, Guiwei	
RIP3 facilitate WNT-driven colorectal cancer initiation	89
Hillebrand, Larissa E.	
Proteolysis in murine breast cancer stem cell plasticity and cellular behaviours	90
Hong, Shin Hee	
Effect of ARS-interacting multifunctional protein 1 (AIMP1) antibody on collagen-induced arthritis	91
Hyrossova, Petra	
Mesenchymal GICs show a shift towards PEPCK-M dependent oxidative metabolism	92
Iftekhar, Amina	
Primary gallbladder organoid culture model for investigating the role of <i>Salmonella typhi</i> infection in development of gallbladder cancer	93
Ishibashi, Tomoko F.	
Identification and characterisation of tumour initiating cells in various mouse mammary tumour models	94

Itou, Junji	
Activation of motility by SALL4-regulated integrin expression in basal-like breast cancer	95
Jekabsons, Kaspars	Presenter: Kaspars Jekabsons, Jana Namniece
Uptake of hypoxic colorectal cancer-derived exosomes by mesenchymal stem cells and monocytes	96
Jingu, Cho	
Tauroursodeoxycholic acid, bile acid, induces blood vessel repair via stem cell mobilisation	97
Jingu, Cho	
ZNF224 decreases p53 and p21 via MIR663A	98
Karacicek, Bilge	
Role of endoplasmic reticulum in phenotypical differentiation of Huh7 hepatocellular carcinoma cell lines	99
Kaur, Pritinder	
Evidence for perivascular MSC-like cells as potent mediators of malignant metastases in xenograft models of ovarian cancer correlated with earlier relapse and mortality in high-grade serous ovarian cancer patients	100
Kawai, Mariko	
Stem cell population and cancer risk in the bone induction by BMP gene transfer	101
Kim, Jee Young	
Acidic stress triggered cancer stem cells	102
Koennig, Delia	
The regulation of RASSF1A and its role in neural development	103
Koifman, Gabriela	
The p53, cancer stem cells and the LOH connection	104
Krausova, Michaela	
The Wnt pathway antagonist NKD1 earmarks colorectal and liver neoplasia driven by perturbed Wnt signalling	105

Kung, Chung Yee		
The role of Salt-inducible kinase 2 in hepatocellular carcinoma		106
Kusienicka, Anna		
Hypoxia and HO-1, but not MICs markers expression, influence the initiation, growth and morphology of B16(F10) murine melanoma clones derived from single-cells		107
Lähdeniemi, Iris		
Keratins regulate colonic epithelial cell differentiation through the Notch1 signalling pathway		108
Landázuri, Natalia		
Cytomegalovirus infection induces a stem cell phenotype in human glioblastoma cells		109
Li, Wenzhao		
Characteristics of estradiol-regulated ALDH+ cancer stem-like cells in hormone receptor positive breast cancer		110
Li, Yinghui		
Molecular events regulating telomerase reactivation at highly recurrent TERT promoter mutations		111
Liu, Jinsong		
Re-thinking the concept of cancer stem cells: Polyploid giant cancer cells function as novel mother cancer stem cells		112
Lobo, Tatiana Carneiro		
Targeting lung cancer initiating cells driven by oncogenic KRAS mutations		113
Luraghi, Paolo		
MET signalling in colorectal cancer-initiating cells blunts response to EGFR targeted therapy		114
Lytle, Nikki		
Malignant progression of pancreatic adenocarcinoma is critically dependent on Musashi		115

Macho-Maschler, Sabine Fra-1/AP-1 induces EMT in mammary epithelial cells by modulating Zeb1/2 and TGFβ expression	116
Mallik, Mrinmay Kumar Analysis of proteins preferentially expressed in glioma cancer stem cells using reactome, the reactome Fi network and David functional annotation tools	117
Mantri, Monica Studies of the activity and inhibition of cytoplasmic TUTs as a strategy for modulating the Lin28A-let-7 axis in cancer	118
Meidute-Abaraviciene, Sandra Cigarette smoke-induced cytotoxicity and mobility decrease in mesenchymal stem cells <i>in vitro</i>	119
Meier, Claudia DNp73 induces epithelial-to-mesenchymal transition and stem-like features in cancer cells through activation of IGF1R signalling	120
Mina, Yu Development and characterisation of human Med28 specific monoclonal antibodies	121
Mohamed Safwat Morsy, Abdelhakim Induced pluripotent stem cell from peripheral blood versus mesenchymal stem cell in retinitis pigmentosa patients	122
Moncho, Veronica Functional characterisation of the interaction between the stem cell factor SOX2 and the cell cycle regulator p27 in normal and cancerous stem cells	123
Morris, Mhairi The viral oncoprotein, LMP1, increases epithelial cell motility and invasion via a Smad-independent TGFbeta and/or activin A-dependent mechanism	124

Mourao, Larissa		
Dissecting intratumoural cell heterogeneity through Notch1 expression		125
Muñoz, Purificación		
Cancer stem cell features change at late stages of carcinoma progression to promote tumour growth and metastasis		126
Nahmias, Clara	Presenters: Sylvie Rodrigues Ferreira, Clara Nahmias	
ATIP3-deficiency and breast cancer stem cells		127
Najumudeen, Arafath K.		
Cancer stem cell inhibitors target K-ras in a stemness-context		128
Nasi, Sergio		
Myc as therapeutic target in glioblastoma stem cells		129
Nicassio, Francesco		
MicroRNAs in the regulation of identity and plasticity of stem cells and progenitors in the normal mammary gland and in breast tumours		130
Noll, Elisa M.		
Subtype-specific models of human pancreatic ductal adenocarcinoma reveal CYP3A5 as a novel mediator of drug resistance		131
Nowak, Witold N.		
Heme oxygenase-1 in mesenchymal stromal cells – influence on squamous cell carcinoma tumour infiltration		132
Nurkovic, Jasmin		
Ageing embryonic stem cells		133
Occhipinti, Annalisa		
Influence of cancer stem cells dynamics on personalised survival analysis		134
Ojalil, Marjaana		
Exploring the composition of prostate cancer extracellular matrix and its role in the tumour microenvironment		135

Ozgul Ozdemir, R. Bilge	Presenter: Alper Tunga Ozdemir	
The relationship between cancer stem cells (CSCs) and nonclassical major histocompatibility complex (MHC) I antigens		136
Palmini, Gaia		
Cancer stem cells in high grade osteosarcoma		137
Papadopoulou, Natalia		
The Promyelotic Leukemia Protein (PML) regulates stemness and migration of breast cancer cells		138
Papaspyropoulos, Angelos		
Loss of Rassf1a deregulates Hippo pathway signalling in tumourigenesis and development		139
Parisi, Silvia		
Identification of miRNAs mediating the function of BMP4 in pluripotent stem cells		140
Pasto, Anna		
Cancer stem cells from epithelial ovarian cancer patients privilege oxidative phosphorylation and resist glucose deprivation		141
Pernicova, Zuzana		
EMT phenotype in distinct subpopulations of adult mouse prostate stem cells		142
Persson, Helena		
Small non-coding RNA profiling of breast cancer		143
Philippova, Maria		
T-cadherin is upregulated in prostate cancer and modulates activities of EGFR, IGF-1R and beta-catenin in prostate cancer cells.		144
Pontel, Lucas B.		
Endogenous metabolism releases genotoxic formaldehyde		145
Pradhan, Tapas		
Surgical Margins act as a potential niche for heterogeneous cancer stem like cells and drug resistance cells in colorectal cancer		146

Prchal-Murphy, Michaela INK4-mediated CDK6 activity controls hematopoietic progenitor potential	147
Reinés, Mar Transforming effects of the <i>H. pylori</i> CagA in human gastric primary cells	148
Ritschka, Birgit Investigating a role for senescence-associated stem cell gene expression	149
Roa, Xavier CPT1C is expressed in mesenchymal stem cells and promotes cell survival under metabolic stress induced by glucose deprivation or 2-deoxyglucose	150
Rodini, Carolina O. Mesenchymal stem cells enhance glioblastoma cell aggressiveness and tumourigenesis	151
Rulands, Steffen Unveiling lineage decisions in developing tissues	152
Rusu, Patricia Identification of differentially expressed genes in neural and brain tumour stem cells	153
Sachini, Nikoleta PML-mediated signalling inhibits breast cancer cell proliferation	154
Sainz, Bruno Intracellular autofluorescence: a biomarker for epithelial cancer stem cells	155
Sánchez-Martínez, Ruth A link between lipid metabolism and epithelial-mesenchymal transition generates cells with cancer stem cells characteristics and provides a target for combined drug therapy in colon cancer	156

Schmidt, Johanna	
Stem cell-like properties and epithelial plasticity arise as stable traits after transient Twist1 activation	157
Schneider, Armin	
TruePrime™, a novel technology for whole genome amplification	158
Shetzer, Yoav	
The onset of p53 loss of heterozygosity is differentially induced in various stem cell types and may involve the loss of either allele	159
