

Akhmedov, Murodzhon	Presenter: Kwee, Ivo W.	
OmicsNet: Multi-Omics Integration using Multilayer Networks		39
Alexandratos, Alexandros		
Transcriptomic and proteomic analysis of a steroidogenic gland model		40
Álvarez-Franco, Alba		
Transcriptome and Proteome Dynamics of a Large Animal Model of Induced Atrial Fibrillation		41
Ana Joy, Padua		
Next-Generation-Sequencing of epithelial ovarian cancer among filipino patients in Philippine General Hospital		42
Asif, Muhammad		
An integrative system biology approach to delineate complex genotype-phenotype associations in Autism Spectrum Disorder		43
Azim, M. Kamran		
Comparative transcriptomics of mango cultivars provided insight of biochemical pathways involved in flavor and color		44
Bachi, Angela		
A multi-omics approach reveals a correlation between Apolipoprotein E and oxysterols in metastatic melanoma		45
Bahl, Aileen		
Integrated multiomics analysis as a useful tool to support nanomaterial grouping and to investigate toxicity pathways		46
Baskaran, Praveen	Presenter: Heumos, Simon; Baskaran, Praveen	
Integrating data, tools and infrastructure to enable efficient experimental designs, data management and bioinformatics analyses in large-scale multi-omics projects		47
Bécavin, Christophe		
Listerionics: an Interactive Web Platform for Systems Biology of Listeria		48

Becker, Jérémie	
Novel approaches for multi-omics pathway enrichment analysis	49
Bekri, Soumeya	
Metabolic causes of non-immune hydrops fetalis: next generation sequencing panel as first line investigation	50
Berest, Ivan	
Differential transcription factor activity analysis based on genome-wide open chromatin assays	51
Billmann, Maximilian	
Genome-wide identification of genetic interactions in human cells using CRISPR/Cas9	52
Björklund, Stefan	
Evolutionarily conserved mechanisms of stress response that converge on Mediator	53
Boos, Felix	
Dissolving the traffic jam - how cells counteract the blockage of mitochondrial protein import pores	54
Borges, Rafael J.	
Using data from proteomics and genomics to tackle sequence uncertainty in crystal structure elucidation	55
Brunelli, Laura	
Multilayer omics strategy for tracing the metabolic routes exploited by KRAS oncogenetic mutation in NSCLC	56
Bunina, Daria	
Chromatin accessibility and transcriptional landscapes during neurodevelopment	57
Burke, Melissa	
Getting started in multi-omics: data integration training with EMBL-EBI	58
Buyukozkan, Mustafa	
Pan-cancer subgroup identification reveals global hallmarks of cancer pathways	59

Calura, Enrica Off the beaten pathways	60
Carré, Christophe Threshold-free analyses of the immune response to the trivalent seasonal flu vaccine identifies genes impacted by vaccination	61
Chedraoui Silva, Tiago Enhancer Linking by Methylation/Expression Relationships with the R package (ELMER) version 2	62
Cheng, Phil TCGAbrowser: A shiny webtool for multiomics analysis of TCGA data	63
Cheng, Shanshan A Functional Network of Gastric-Cancer-Associated Splicing Events Controlled by Dysregulated Splicing Factors	64
Chiu, Anthony Multi-omics analysis of circulating tumour cell-derived explants in small cell lung cancer	65
Cook, Helen Virus-host protein-protein interactions in STRING	66
Corvino, Dillon Improving the therapeutic potential of cellular immunotherapies	67
Da Silva Liberio, Michelle Decoding the pathogenic role of trisomy 12 in chronic lymphocytic leukemia	68
Derian, Nicolas Daedalus: Integrating cytome data for translational research	69
Diether, Maren Detecting allosteric enzyme-metabolite interactions in vivo	70
Dimitrakopoulos, Christos Network-based integration of multi-omics data for prioritizing cancer genes	71

Do, Kieu Trinh	
Phenotype-driven identification of modules in a hierarchical map of multifluid metabolic correlation	72
Eckhardt, Manon	
Multiple Routes to Oncogenesis are Promoted by the Human Papillomavirus-Host Protein Network	73
Edfors, Fredrik	
Gene specific correlation between protein and RNA	74
Eraslan, Basak	
Effects of cis-regulatory elements on post-transcriptional regulation	75
Erola, Pau	
Host response processes and host-parasite interactions in Trypanosoma brucei infections	76
Fan, Xiaochen	
Multi-omics data integration in head development: a TWIST1 centric protein interactome and gene regulation network	77
Fancello, Laura	
Analysis of the transcriptome, translatoome and proteome associated to a ribosomal protein L10 mutation in T-cell leukemia	78
Flynn, Ryan	
A combined genetic and proteomic approach identifies functionally important host factors associated with flaviviral RNA	79
Foroutan, Momeneh	
Transcriptome dimensional reduction through gene-set scoring: an example with TGFβ-induced EMT in cancer	80
