

Aguilar Rojas, Arturo	
Investigating intestine homeostasis and pathologies using microfabrication tissue approaches	47
Aguilar-Hidalgo, Daniel	
Dynamic gradient scaling as a critical point of growth control	48
Aryaksama, Thibault	
Competition between micro-scale and meso-scale geometrical patterns on the architecture of a myoblasts monolayer	49
Badugu, Amarendra	
Cytoplasmic flows during Interkinetic nuclear migration	50
Badu-Nkansah, Kwabena	
Proximity labeling proteomics of desmosomes reveals novel components essential for epidermal integrity	51
Bailles, Anais	
A mechanically-driven tissue contractile wave polarizes morphogenesis of the Drosophila endoderm	52
Balasubramaniam, Lakshmi	
Role of E-cadherin in altering tissue topology during collective migration	53
Balijepalli, Arvind	
Label-free electronic measurements for biochemical tissue mapping	54
Barriga, Elias H	
Mesoderm stiffening triggers neural crest collective migration in vivo	55
Baumgärtner, Stephan	
Cellular identity in a tissue: local cell-cell communication allows to infer global position	56
Belyaeva, Vera	
bZIP transcription factors counterbalance each other to tune macrophage invasive migration	57

Bojer, Mareike		
Cellular automata network model for cell differentiation		58
Brito, Catarina		
iPSC-derived neurospheroids recapitulate development and pathological signatures of human brain microenvironment		59
Buchmann, Benedikt	Presenter: Buchmann, Benedikt; Fernandez, Pablo	
Mechanisms in branching morphogenesis and their mechanical origin		60
Centanin, Lazaro		
Self-organisation of the stem cell - niche unit during organogenesis		61
Cheng, Yu-Che		
Fluid shear stress induced cell cycle arrest and enhanced neuronal cell differentiation		62
DasGupta, Piyal Taru		
Investigating the basis of precision in epithelial fusion during Drosophila dorsal closure		63
Dong, Bo	Presenter: Dong, Bo; Lu, Qiongquan	
Tail bending of Clona embryogenesis		64
Douillet, Arthur		
A multi-agent model for cellular motion in human keratinocytes culture		65
Dupuis-Williams, Pascale		
Tubulogenesis relies on the ciliopathy protein MKS1		66
Eskova, Anastasia		
Gain-of-function mutations of mau/DrAqp3a influence zebrafish pigment pattern formation through the tissue environment		67
Étienne, Jocelyn		
Buckling of epithelium by apical-only actomyosin action		68

Ferenc, Jaroslav		
Mechanochemical crosstalk in Hydra-self organisation		69
Ferree, Patrick		
Precise timing of cell divisions during Drosophila gastrulation		70
Gehrels, Emily W		
Controlling colloidal self-organisation using light		71
Goldner, Amanda		
The role of nonapical forces in Drosophila gastrulation		72
Gosti, Giorgio		
Differentiation and symmetry breaking in the evolution of neural rosettes derived from human induced pluripotent stem cells (hiPSCs)		73
Gu, Langyu		
Revelation of the genetic basis for convergent innovative anal fin pigmentation patterns in cichlid fishes		74
He, Mu		
Cytoplasmic chloride couples membrane remodeling to epithelial morphogenesis		75
Hu, Di		
Ets2 control of tissue size in early mouse embryogenesis		76
Imran Alsou, Jasmin		
Tissue organisation in a small multicellular structure		77
Irion, Uwe		
Pigment pattern formation in Danio fishes		78
Jain, Akanksha		
Coordinated cell membrane shrinkage by an actomyosin cable functions during serosa window closure in Tribolium castaneum		79
Jain, Shreyansh		
Polarity dynamics of epithelial trains during initiation and maintenance of directed collective cell migration		80

John, Alphy Probing a two-tier junctional machinery that drives ventral furrow invagination during <i>Drosophila</i> gastrulation	81
Kalabusheva, Ekaterina Self-organisation of postnatal human skin cells into hair follicle germ in vitro	82
Libby, Ashley Mosaic spatiotemporal patterning of pluripotent stem cells using inducible CRISPR interference	83
Lv, Zhiyi Collective nuclear flow in syncytial <i>Drosophila</i> embryos	84
Masselink, Wouter Periodic segmentation of the regenerating axolotl tail	85
Matos, Irina Progenitors polarize WNT activators and inhibitors to directionally orchestrate tissue development	86
McKinley, Kara Cell division mechanics pattern cells in mammalian epithelia	87
Mizera, Andrzej Synergy among core transcription factors contributes to cell subpopulations identities and enables controlling their collective cellular behaviour	88
Nandi, Sudeepa Cell behaviours and forces that position tissues during germband retraction in <i>Drosophila melanogaster</i>	89
Nishiyama, Koichi A reconstitution assay system for the understanding of angiogenic morphogenesis: the morphogenetic function of perivascular pericytes	90
Ong, Katy Multiple feedback mechanisms fine-tune Rho signaling to regulate morphogenetic outcomes	91

Ong, Kok Haur Semi-automated quantitative image analysis of three-dimensional epithelial cell morphology	92
Petridou, Nicoletta Fluidization-driven tissue spreading triggered by mitotic cell rounding and non-canonical Wnt signaling	93
Popkova, Anna Probing a cell shortening machinery driving cephalic fold formation	94
Pour, Maayan Interplay between cell state transitions and self-sorting during early differentiation of mouse embryonic stem cells	95
Priya, Rashmi Delineating the cytomechanics of cardiac trabeculation	96
Ramirez-San Juan, Guillermina Biophysical interactions between cilia and mucus underlie directed fluid transport in the ventral epithelium of the planaria <i>S. mediterranea</i>	97
Ramm, Beatrice The MinDE system is a generic spatial cue for membrane protein distribution in vitro	98
Cancelled	99
Saez, Pablo Computational mechano-biology in epithelial wound healing	100
Sakayli, Bechara Regional differences in nascent mesoderm cell morphology and migration mode in the mouse embryo	101
Schauer, Alexandra Tissue self-organisation in early zebrafish development	102

Seijo-Barandiarán, Irene Dynamics of signaling filopodia: in vivo imaging in <i>Drosophila melanogaster</i>	103
Solon, Jérôme The evolution of tissue mechanics: rupture, contraction and seaming during dorsal closure in the scuttle fly <i>Megaselia abdita</i>	104
Soloperto, Alessandro Presenter: Fraire-Zamora, Juan J. Toward development of an in-vitro model to study the synergistic interplay between cellular mechano-sensitivity and scaffold mechanical features	105
Stern, Tomer Toward an automated systematic approach to multicellular motif analysis in tissue organisation	106
Suratekar, Rohit Evidence of sinks and sources in the PLC activated PIP2 cycle	107
Takagishi, Maki Planar polarized microtubule dynamics and coordinated ciliary beatings in the lateral ventricular wall	108
Thalheim, Torsten Linking stem cell function and growth pattern of intestinal organoids	109
Tozluoglu, Melda Mechanical regulation of tissue growth and shape formation	110
Tschopp, Patrick Pattern formation and evolution during vertebrate digit development at single cell resolution and in silico	111
Umetsu, Daiki Differential expression of an ancient cell surface recognition molecule guides cell sorting at the anteroposterior compartment boundary in <i>Drosophila</i>	112
Vadakan Cherian, Anoop Mechanical force exerted after the first breath on the alveolar sacks influence lung morphogenesis	113

Valon, Léo	
Role of ERK in mechanical cell competition	114
Vu, Hanh	
Worm in the mirror: how do planarians regenerate bilateral symmetry?	115
Wang, Minhong	
Agent state based modelling of pattern formation in pluripotent stem cells	116
Wegner, Seraphine	
Blue light switchable cell-cell interactions provide reversible and spatiotemporal control	117
Wisniewski, Darren	
Can you point me in the right dimension? Tissue architecture and cell identity	118
