Abreu, Mónica: Presenter: Basti, Alireza

TNF and the clockwork: a reciprocal interplay

Amponsah, Prince Saforo

A potential role for peroxiredoxins and hydrogen peroxide in regulation of the yeast metabolic cycle

Ananthasubramaniam, Bharath

Ultradian rhythms in the transcriptome of Neurospora crassa

Aydogan, Mustafa G.

A homeostatic clock sets centriole size in flies

Barberis, Matteo

The Multiplex Phase Interlocker – A Novel and Robust Molecular Design Synchronizing Transcriptional with Cell Cycle Oscillators

Baum, Katharina

Feedback, Mass Conservation and Reaction Kinetics Impact the Robustness of Cellular Oscillations

Biga, Veronica

Interpreting protein oscillation dynamics in 3D multicellular systems using novel Matérn covariance models

Calverley, Ben

A Mathematical Day in the Life of Collagen

Carmo Silva, Sara

Hypothalamic ataxin-2 and circadian rhythm

Cervený, Jan

Combined model of circadian clock and central C-N metabolism of cyanobacteria: reaction network analysis for optimal fitness in dynamic environments

Chang Marchand, Yunhua

Dosing time dependent in vitro pharmacodynamics of Everolimus despite a defective circadian clock
Courtney, Michael J.
Design and use of optogenetic inhibitors of endogenous MAPKs reveals resonance between transcription-regulating circuitry and temporally-encoded inputs

De Caluwé, Joëlle
Modeling the photoperiodic entrainment of the plant clock

del Olmo, Marta
Mathematical modelling of redox circadian oscillations: switches and sequestration

Descheemaeker, Lana
Single gene oscillators based on dimerization and multiple binding boxes

Droin, Colas
How can two biological oscillators synchronize? A study of the cell-cycle influence on the circadian clock

El-Athman, Rukeia
A systems-level analysis reveals circadian regulation of splicing in a tumour progression-dependent manner

Esposito, Emilia
Chromatin dynamics during mouse somitogenesis

Fanelli, Duccio
Noise driven neuromorphic tuned amplifier

Folguera-Blasco, Nuria
Epigenetic regulation of cell fate reprogramming in aging and disease

Gagliano, Onelia
Frequency-encoded metabolic stimulations induces anti-phase circadian resetting

Garcia, Guadalupe C.
Temporal food restrictions lead to stronger mitochondrial gene regulation in mouse
Genov, Nikolai
Ultradian rhythms are evolutionary conserved and play key roles in vital cellular functions 60

Granada, Adrian
How the circadian clock and the cell cycle influence cell fate decisions in response to chemotherapy 61

Härtter, Daniel
Towards a dynamical systems perspective on single cardiomyocyte contraction dynamics 62

Hauser, Yannick
Genetic characterization of a developmental oscillator 63

Heymann, Michael
Up from the bottom: 3D printing at the diffraction limit to capture biological dynamics 64

Hörning, Marcel
Spatiotemporal dynamics of line defects in cardiac tissue 65

Joanito, Ignasius
An incoherent feed-forward loop switches the Arabidopsis clock rapidly between two hysteretic states 66

Kanders, Karlis
Frequency sensitivity in mammalian hearing from a fundamental nonlinear physics model of the inner ear 67

Klein, Philipp
Modeling the oscillating cellular stress response to hepatitis C virus infection 68

Kuritz, Karsten
Broadcast control of oscillating cell populations 69

Kursawe, Jochen
Initiation and interpretation of transcription factor dynamics during embryonic neurogenesis 70
Li, Xiao-Mei
Circadian meal timing improved irinotecan chronotherapeutics in mice 71

Li, Yin
Characterization of the circadian clock in pancreatic cancer and implications for therapy optimization 72

Manning, Cerys
HES5 dynamics in fate-decisions during mouse neural development 73

Matsumiya, Marina
ES cell-derived presomitic mesoderm-like tissues for analysis of synchronized oscillations in the segmentation clock 74

Meeuse, Milou
Transcriptional mechanisms of oscillatory gene expression during C. elegans development 75

Miller, Anzy
Decoding the dynamic behaviour of Ngn2 in Neurogenesis 76

Minas, Giorgos
Long-time analytic approximation of large stochastic oscillators: Simulation, analysis and inference 77

Misailidis, Georgios
Mechanistic insights on the interplay between cell signaling and oscillatory dynamics 78

Morales Moya, Lucas
Quantitative analysis and modelling of the segmentation clock 79

Munns, Jack
Circadian Rhythms in Caenorhabditis elegans 80

Munoz, Jose
Mass-less oscillations in cells driven by delayed chemo-mechanical coupling 81

Naganathan, Sundar
Emergence of bilaterally symmetric somites 82
Narayanan, Rachna
*Telling good segmentation from bad*  

Negrete Jr, Jose
*Stochastic clocks and timers in genetic networks*  

Pedone, Elisa
*Unravelling the role of β-catenin dynamics in mouse embryonic stem cell (mESC) identity*  

Phillips, Nick
*Quantitative live-cell analysis of transcriptional memory in dividing mammalian cells*  

Raina, Dhruv
*Rapid ERK activity pulses in mouse ES cells encode extracellular FGF concentration*  

Rombouts, Jan
*Delay models for the early embryonic cell cycle oscillator*  

Ruggiero, Gennaro
*Per2: a molecular gear between the circadian clock and cell cycle?*  

Sabherwal, Nitin
*Targeting Hes1 gene expression dynamics to tackle cellular plasticity and quiescence in breast cancer*  

Sanchez, Paul Gerald
*Microfluidics-based entrainment of signaling oscillations in presomitic mesoderm cells*  

Schleimer, Jan-Hendrik
*Mechanisms Of Action Selection In Drosophila's Wing Motor Circuit*  

Siauciunaite, Rima
*Linking the circadian clock and metabolism*  

Sigloch, Christian
*Notch-independent her6 and her9 together with Notch-dependent her4 and her15 Regulate Neural Progenitor Cell Development in Zebrafish*
Skeldon, Anne
Coupled oscillator models of sleep-wake dynamics: the interaction of light, sleep, circadian and social rhythms 95

Sládek, Martin
The crosstalk between the mammalian endocannabinoid and circadian systems 96

Somsel, Heidi
Mechanical Coupling and Synchronization of Human Embryonic Stem Cell-Derived Cardiomyocytes 97

Sonnen, Katharina
Modulation of phase shift between Wnt and Notch signaling oscillations controls mesoderm segmentation 98

Šoštar, Marko
Oscillatory dynamics of Rac1 GTPases in Dictyostelium 99

Soto, Ximena
Her6 versus miR-9; tuning the protein dynamics in ongoing neurogenesis 100

Stengl, Monika
Pigment-dispersing factor expressing circadian clock neurons of the Madeira cockroach form a neuropeptide-dependently labeled line circuit controlling sleep wake cycles 101

Thorne, Steve
Correlations Linking Gravitational Potential Energy To Cell Metabolism 102

Tiedemann, Hendrik B.
Compartment models for multi-scale simulations of oscillatory gene expression patterns in somitogenesis, neurogenesis, and pancreas development 103

Upadhyay, Abhishek
Mathematical modeling of fungus Neurospora crassa circadian clock 104
