A. Coelho, Paula
Pathways controlling centrosome numbers  43

Abajo Lima, Nuria  Presenter: Dale, Trevor
Scale up of organoid expansion and fractionation for their use in
preclinical drug discovery  44

Abu Shah, Enas
3D Model System to Study Immune Regulatory Networks  45

Ah-Cann, Casey
Developing an embryonic lung progenitor culture system: technique and
applications  46

Akbari, Soheil
Real Time Monitoring of Albumin Synthesis in Ipse-Derived Liver
Organoids  47

Alsaadi, Abdulkhalilq
Modeling Human Fallopian Tube tissue using patient-derived organoids  48

Alzheimer, Mona  Presenter: König, Fabian
Exploring virulence factors and regulators of the food-borne pathogen
Campylobacter jejuni in a novel human 3D tissue infection model  49

Ameneiro, Cristina
Ccm genes are required for early endothelial cell-fate specification and
vessel formation  50

Arlot-Bonnemains, Yannick
In vitro 3D models for renal cancer research  51

Bekman, Evguenia P.
Generation of gene-edited cerebellar organoids from hiPSCs for disease
modelling of NPC1 ataxia  52

Berg, Hege F.
Patient-Derived Organoid Models for Disease Modeling and Drug
Screening in Endometrial Cancer  53
Billing, Lawrence
Physiological insights into L-cells subpopulations in colonic organoids 54

Boccellato, Francesco
The "mucosoids": a new stem cell-driven culture of polarized epithelial cells, to model infection and host response 55

Bode, Konstantin J.
A fluorometric method to detect cell death in intestinal organoids 56

Bouffii, Carine
In vivo engineering human intestine with immune cellular features 57

Budkova, Zuzana
Non-coding RNAs on DL K1-DIO3 locus enhance basal phenotype and increase clonogenic capacity in 3D culture 58

Bulanova, Elena
Formative 3D Biofabrication: From Scaffold to Scaffold 59

Busslinger, Georg
Cellular characterization of Barrett’s esophagus 60

Cacho Navas, Cristina
Molecular mechanisms mediating Intercellular Adhesion Molecule 1 (ICAM-1) polarization in hepatic cells and 3D adult liver organoids during the hepatic immune response 61

Cambuli, Francesco
Systematic pathway analysis in mouse prostate organoids reveals novel insights into prostate tissue homeostasis and tumorigenesis 62

Caporale, Nicolò
From Cohorts to Organoids: Endocrine Disruption in Human Neurodevelopmental Models 63

Chacón-Martínez, Carlos Andrés
An in vitro reconstituted stem cell niche reveals dynamic cell fate transitions between stem cells and their progeny 64
Chan, Wing Yue
Small diameter vascular graft derived from xenogeneic source retains bioactivity for re-endothelialization of human endothelial cells 65

Chew, Leon H.
CRISPR/Cas9 Gene Editing of CDK5RAP2 in Human Pluripotent Stem Cells, Derivation of Genetically Stable Clonal Lines and Formation of Cerebral Organoids using the STEMdiff™ Human Cerebral Organoid culture system 66

Cho, Hyun-Soo
Liver specific Gene Expression Panel (LiGEP): quantitative predictive system for the differentiation status of hPSC derived-hepatocyte 67

Cho, Young-Won
Patients-derived organoids as co-clinical model for chemo-reflectory colorectal cancer patients 68

Cilli, Domenica
Drug screening of patient-derived cancer organoids 69

Colás Algora, Natalia
Effect of hepatic organoids on endothelial Rho GTPase expression and barrier function 70

Conder, Ryan K.
Functional Applications of Human Intestinal Organoids Established and Maintained in Intesticult™ Organoid Growth Medium (Human) 71

Cordero-Espinoza, Lucía
Liver peri-portal mesenchymal cells behave as a niche population for ductal cells in vitro and in vivo 72

Crispi, Stefania
Anticancer activity of natural compounds 73

Cruz, Nelly M.
Phenotypic screening in human kidney organoids to assess safety and efficacy of small molecule therapeutics 74
Darmasaputra, Gabriella
Studying developmentally-regulated polyploidization using human hepatocyte organoids 75

Däullary, Thomas
Investigation of Human-Pathogens Interaction Using a Primary in vitro Model of the Human Small Intestine 76

Daum, Ann-Kathrin
In vitro-models to investigate the influence of the tumor microenvironment on therapy resistance mechanisms in lung adenocarcinoma 77

Dayton, Talya
Using human lung organoids to study pulmonary neuroendocrine cells 78

De Zuani, Marco
Mimicking intestinal inflammation and immune response in an iPSCs-derived gut organoid 79

Della Chiara, Giulia
Dissecting the dynamic interplay between colorectal cancer and T regulatory cells by exploiting the organoid models 80

Deniaud, Aurélien
Development of 3D hepatic cultures on-chip for the study of metal homeostasis in physiological and disease conditions 81

Dossena, Marta
Presenters: Dossena, Marta; Cherubini, Alessandro
New Identity Definition of Human Pancreatic Organoids 82

Ewan, Kenneth
Live, Label Free Imaging of 3D Tissue Organoids Using CARS Microscopy 83

Faccenda, Danilo
Investigating cell division pathways in intestinal organoids 84
Fagerlund, Ilkka
Modelling Alzheimer’s Disease Using Human Cortical Cerebral Organoids 85

Feng, SiSi
Large-scale generation of transplantable and functional Hepatocytes and Cholangiocytes from endoderm progenitor cells 86

Fernandez Vallone, Valeria
ThyroSphere: An hiPSC-derived Thyroid-Follicle-Model for Basic and Translational Science 87

Fey, Christina
Establishment of a murine intestinal tissue model based on immortalized primary epithelial cells 88

Fievet, Loic
Molecular and cellular events occurring during endochondral development of organoids derived from mesenchymal stromal cells 89

Flum, Marion
Establishment of intestinal organoids as an ex vivo model system for tumor cell invasion 90

Flynn, Kevin
Gaining Access to the Intestinal Epithelium: Converting Organoids to MimEX™ GI 91

Fonseca Pedro, Patricia
Culturing porcine small intestinal organoids 92

Freer, Matthew
Construction of 3D mucosal intestinal models to enhance the structure and function of epithelia 93

French, Stephanie
Using an Enteroid Model to Determine the Mechanisms of Bcr-Abl Inhibitor-Induced Diarrhoea 94

Geuens, Thomas
Unraveling the role of the extracellular matrix during kidney organoid maturation 95
Girgin, Mehmet Ugur  
Towards in vitro modeling of early mouse development  

96

Gkatzis, Konstantinos  
Three-dimensional distal alveolar (3D-DistAL) cultures: a tool to study alveolar cell fate decisions and morphological transitions  

97

Gleisinger, Elisabeth  
Tamoxifen confounds experimental outcomes in murine intestinal organoids highlighting the use of proper controls  

98

Goldspink, Deborah  
Synergistic action of bile and free fatty acid receptors on enteroendocrine cells in intestinal organoids  

99

Gonçalves, Carla  
A human pancreatic organoid model to study cell fate decisions during organogenesis  

100

Gosens, Reinoud  
A retinoic acid-YAP signalling axis controls adult distal lung epithelial progenitor cell proliferation  

101

Groen, Andries  
Generation of Hormone Producing Thyroid from Human Adult Tissue Derived Organoids  

102

Gustafsson, Anna  
Patient derived breast cancer scaffolds – an in vivo like screening system for cancer treatments  

103

Ha, Jeongmin  
Generation of midbrain-specific organoid from genetically engineered induced pluripotent stem cells of Parkinson’s patient  

104

Han, Dong Wook  
Presenter: Kwak, Taehwan  
Midbrain Organoids for Modeling Parkinson’s Disease  

105

Han, Dong Wook  
Presenter: Kang, Kyuree  
The Liver Organoids Generated from Human Pluripotent Stem Cells  

106
Han, Dong Wook
**3D Brain Organoids as a Platform for in vitro Modeling Idiopathic Autism Spectrum Disorder**

Heinz, Maria C
**Cellular heterogeneity in human colorectal cancer organoids**

Hendrikse, Simone I.S.
**Supramolecular hydrogels for intestinal and liver organoid expansion**

Hof, Lotta
**Light sheet-based fluorescence microscopy provides morphological quality control parameters for pancreatic organoids**

Hoffmann, Karen
**Suppression of Wnt signaling is essential for the preservation of stemness in high grade serous ovarian cancer organoids**

Hu, Huili
**3D hepatocyte organoid culture recapitulates the proliferative liver damage response**

Hua, Guoqiang
**Predicting the Outcome of Rectal Cancer Patients Underwent Neo-adjuvant Chemo-radiotherapy by Patient-derived Organoids (PDO): The Potential use organoid model as a companion diagnostic**

Huang, Yanyan Shery
**Low-voltage electrospinning for constructing 3D fibrous scaffolds for organoid culture**

Hudry, Bruno
**Intrinsic sex differences in intestinal cell plasticity**

Ilieva, Mirolyuba
**Abnormal cellular proliferation in brain organoids derived from autistic patients**
Jabali, Ammar
A human cell culture model for EML1-induced subcortical band heterotopia 117

Jackson, Melissa
Modelling the cornea as a bilayered spheroid: A novel platform to assess cell quality for corneal grafting and to investigate epithelial/mesenchymal directed reprogramming 118

Jarde, Thierry
Age-related defects of intestinal stem cells and functional rejuvenation revealed using organoid cultures 119

Jaros, Josef
3D bioprinting as a tool for spatial organization stem cells into biological structures 120

Jian-Motamedi, Fariba
From murine embryonic stem cells to self-renewing renal progenitors and kidney organoids 121

Jóelsson, Jón Pétur
A novel bronchial epithelial model allowing studies on ventilator induced injury 122

Jukas, Juri
Dissecting pancreatic exocrine heterogeneity to identify a bi-potent progenitor 123

Jung, Kwang Bo
A Comparative transcriptome analysis of human pluripotent stem cell-derived contracting cardiomyocytes using a 3D embryoid body model with fetal bovine serum 124

Jung, Yong Hun
Presenters: Jung, Yong Hun; Yang, Ji Hun
A novel efficient Matrigel-free culture system for the derivation of colon organoid 125

Jung-Klawitter, Sabine
Modeling neurotransmitter deficiencies with brain organoids 126
Kahlert, Ulf
Accurate and subtype-specific disease modeling of brain cancers using stem cells 127

Kaluthantrige Don, Mewanthi Flaminia
Development and characterisation of 3D liver models to investigate drug toxicity 128

Kang, Kyojin
Comparison of chemically derived progenitor from patient-specific livers 129

Kang, Sun-Woong
Mass production of 3D cell spheroid using hexanoyl glycol chitosan 130

Kayisoglu, Özge
Profiling of gastrointestinal organoids reveals distinct expression patterns of innate immune receptors and active apical TLR4 signaling in the stomach 131

Kim, Jihoon
Defining novel RING E3 ligases involve in intestine adult stem cell homeostasis 132

Kim, Minsuh
A human lung cancer organoid biobank for in vitro patient modeling system and drug screening 133

Kim, Sun Young
Functional roles and regulation of PRMT1 during neuronal differentiation. 134

Kim, Yohan
Reprogramming into hi-potent hepatic progenitor cells from human hepatocytes using small molecules 135

Koch, Michael
Characterisation of patient-derived liver organoids for precision medicine in primary liver cancer 136
Kruithof-de Julio, Marianna
Molecular and phenotypic characterization of cancer stem cells and organoids from prostate cancer xenografts

Kucab, Jill
Using human tissue organoids to investigate mutational signatures induced by genotoxic carcinogens

Kumar, Manoj
Cerebral Organoids for screening molecules and dissecting neuronal migration for personalized therapy

Kurek, Dorota
A tubular organoid-derived gut-on-a-chip model by preserving the stem cell niche of Lgr5+ intestinal epithelia

Kwon, Ohman
Identification of novel serum factor which is required for differentiation and maturation of hPSC-derived cardiomyocyte sheets and normal cardiac development

Larsen, Michael
A human pancreas organoid model to explore the consequences of GLIS3 mutations in relation to neonatal diabetes

Le Blanc, Solange
In-depth molecular characterization of pancreatic ductal adenocarcinoma based on patient-derived tumor organoids.

Lee, Hana
Imaging and tracking of intestinal organoids from human induced pluripotent stem cells in vitro and in vivo

Lee, Hanbyeol
Different RAGF expression through redox-sensitive DAMP is critical to destroyed lung organization

Lee, Ju-Hyun
Human organoid model exhibiting early neural tube morphogenesis
Lee, Seung Bum
Mesenchymal stem cell secretome-induced a Wnt/Notch pathway is required to enhance regrowth of intestine stem cells on the radiation response of intestinal organoid

Leiva Arrabal, Maria del Carmen
Scaffolds derived from breast cancer as a model to study drug response

Lorenzoni, Marco
Prostate Cancer Secretome: Toward Better Diagnosis and Clinical Management

Lukonin, Ilya
Molecular mechanisms underlying intestinal organoid development

Lulla, Valeria
A Novel Enterovirus Protein Modulates Infection in Gut Epithelial Cells

Ma, Shaohua
A microfluidics-based approach towards organoids fabrication

Madacsy, Tamara
PMCA pump dysfunction can lead Ca2+ overload and pancreatic ductal epithelial cell damage in Cystic Fibrosis

Maléth, József
Pancreatic ductal organoid cultures are suitable model to study pancreatic ductal ion secretion

Malhotra, Divyanshu
Spatio-temporal regulation of concurrent developmental processes by ligand specificity and generic downstream receptor signaling

Marinic, Mirna
Evolution of mammalian pregnancy and molecular causes of preterm birth

May, Tobias
Personalized cell systems – reproducible and functional immortalization of primary cells
McFaline-Figueroa, José L.
Single-cell RNA-Seq of human kidney organoids derived from pluripotent stem cells to identify cells of origin in renal pathogenesis

McGarry, Lynn
Image Analysis and Quantification Strategies Applied to 3D Experimental Systems in Cancer Research

Mergener, Svenja
Effects of pharmacological compounds on patient-derived pancreatic cancer cell lines in 2D and 3D cell culture models

Mijosek, Vedrana
Airway cell models to investigate the epigenetic regulation in COPD pathogenesis

Min, Dong-Wook
Single Cell Genomic Analysis of Colorectal Cancer Stem Cell Heterogeneity

Moerkens, Renée
Towards a personalized model of Celiac disease-on-a-chip

Montes-Olivas, Sandra
Multiscale modelling of crypt fission in organoids

Morera, Erika
YK1 -40 expression in HFR2 overexpressing breast cancer cells increases aggressiveness and promotes angiogenesis

Moreth, Till
The traction force linker PIEZO1 and the CFTR ion channel are key transductors of mechanical forces in growing pancreatic organoids

Na, Hyelin
Generation of a tumor organoid library from endometrial cancer patients

Németh, Margit
A new model in pancreas physiology: human ductal organoids
Nugraha, Bramasta
Optimization of cardiac microtissues formation as disease modelling tool 169

Ochocka-Fox, Anna Maria
Modelling the Functional Effects of a Common Colorectal Cancer Risk Locus in Human Rectal Mucosa Organoids 170

Oksdath Mansilla, Mariana
Characterization of mechanosensitive pathways in human brain development 171

P. Silva, Teresa
Scalable generation of mid-hindbrain organoids from human pluripotent stem cells 172

Pakula, Hubert
The role of TMPRSS2-ERG fusions in modulating tumor microenvironment in prostate cancer 173

Paradiso, Francesca
3D-patient derived tumour model for epigenetic drug testing 174

Pastula, Agnieszka Maria
Stromal niche regulates epithelial cell proliferation and differentiation via a paracrine mechanism that involves TGF-beta and CTGF 175

Peitzsch, Claudia
Primary models of prostate cancer for radiobiological studies 176

Pham, Minh-Duc
Metabolic control of proteome surveillance in human cardiac organoids 177

Presenter: Krishnan, Jaya

Pott, Johanna
Colonic organoids – defining the epithelial response during IBD 178

Puca, Loredana
Patient-derived organoids to model castration-resistant neuroendocrine prostate cancer 179
Rannikmae, Helena
An in vitro model of reversible tumorigenesis reveals altered microtubule dynamics in intestinal organoids lacking APC

Rathfelder, Nicole
Intestinal Organoids as in vitro Toxicology Model for Pre-Clinical Safety

Recher, Gaëlle
Driving cell self-assembly for the generation of shape-controlled organoids

Reischmann, Nadine
Modeling the effect of oncogenic mutations on the organization and signaling network of intestinal crypt cultures

Riedl, Tobias
Establishment and validation of a 3D cultivation system "CERO" for hepatic spheroids to study virus induced hepatitis

Rocha-Martins, Mauricio
Live imaging reveals the mechanisms driving bidirectional migration of cone photoreceptor precursors in the developing retina

Rrapaj, Eltjona
Malignant mesothelioma organoids and patient derived xenografts as tools to study drug sensitivity and tumor microenvironment

Rubert, Josep
A novel integrative strategy to prevent colorectal cancer within the diet-host-microbiota TRIANGLE: from organoids to human in vivo reality

Salamone, Monica
Improvement of Langerhans Islets function in Three-Dimensional collagen Gel

Samuelsson, Erik
Designing a Biomimetic Matrix for the Cultivation of a Glioblastoma Organoid
Schumacher, Anika
Organoid mapping: phenotypic characterization of kidney organoid development for regenerative medicine 190

Segeritz-Walko, Charis
Establishing mouse hepatic organoids using HepatiCult™ serum-free medium 191

Serrano Martinez, Paola
Notch signaling in salivary gland organoids 192

Sim, Hyuna
Distinct gene expression changes in intestinal and neural organoids from familial Parkinson’s disease patient-derived iPSCs 193

Smith, Lucy
Modelling the Development of Human Tissues In Vitro Using a Combination of Advanced Cell Technologies and Mammalian Stem Cells 194

Soltanian, Anahita
Transplantation of Pancreatic Organoids Derived from Human Embryonic Stem Cell through a Bic-Printed Tissue Trapper 195

Presenter: Tahamtani, Yaser

Son, Ye Seul
Development of drug screening platform with SMA patient-specific iPSC-derived 3D motor neuron progenitors 196

Steinhäuser, Sophie
FCM1 secreted by HFR2-overexpressing breast cancer cells generates vascular niche that further accelerates cancer cell growth and migration 197

Stingl, John
Expansion of mouse prostate epithelial stem cells in serum-free ProstaCult™ Organoid Growth Medium (Mouse) 198

Sushama Jose, Shyam
Inflammatory response of stem cell derived lung organoid upon stimulation by pathogen associated molecular patterns 199
Svanström, Andreas
3D printed hydrogels resembles de-cellularized patient derived breast tumors by the characteristics and response of reporter breast cancer cells

Thiele Orberg, Erik
Organoids for the study of type I interferon-inducing metabolites in protection against inflammatory tissue damage

Thompson, Louise
A gliadin-derived peptide induces CFTR-dependent enteroid swelling

Toscani, Cecilia
Cross Talk Between Colorectal Cancer Mutations and Chromatin Modifiers Combining High-Content Screens with 3D Organoids

Trattaro, Sebastiano
Weaver Syndrome-associated intellectual disability: mechanistic dissection of Polycomb-dependent dysregulation in patient-derived neuronal lineages

Traustadottir, Gunnhildur Asta
Expression, regulation and role of PXDN, a collagen IV crosslinker, in the mammary gland

Tripal, Philipp
Confocal live cell imaging of three dimensional organoids

Ureña Martin, Carlos
Study of the mechanical role of caveolae in 3D tumoral proliferation

Valle-Encinas, Eider
Use of liver organoids to study hepatic stem cell dynamics

Vias, Maria
Human primary high grade serous ovarian carcinoma organoid cultures for disease modelling and drug screening
Vrij, Erik
Recapitulating early embryonic development of the mouse using stem cells 210

Wegert, Jenny
Spheroid cell cultures as an in vitro Wilms tumor model 211

Wiener, Zoltán
Tumor organoid models for studying extracellular vesicles 212

Wu, Xinhui
WNT-5A/5B signaling represses functional responses in lung epithelial progenitors 213

Yennek, Siham
Optimisation of 3D Pancreas Organogenesis in Mouse and Human 214

Yoon, Sangtae
The use of direct conversion for the generation of hepatocyte-like cells for transplantation into various mice models 215

Yoon, Seung-Bin
Superoovulatory responses in cynomolgus monkeys (Macaca fascicularis) depend on the interaction between donor status and superovulation method used 216

Young, Rachel
Development of in vitro enteroids derived from bovine small intestinal crypts 217

Zaragkoulis, Andreas
Harnessing the potential of embryo-derived pancreas organoids to model KRas-driven early tumorigenesis. 218

Zhang, Kaiyi
Salmonella infection in cultivated small intestinal crypts 219
