

Ahan, Recep Erdem		
<b>Engineered cells for controlled protein release</b>		37
Athale, Chaitanya		
<b>Self-organized swarming by microtubule asters driven by diffusible kinesins and cortical dyneins in simulation</b>		38
Bagh, Sangram		
<b>A population level digital 2-to-4 genetic decoder connected by chemical wires and single cell 2-to-1 de-multiplexer in Escherichia coli</b>		39
Barbier, Içvara		
<b>The toggle switch for spatial pattern formation</b>		40
Barrias, Cristina C		
<b>Guiding vascularized microtissue formation with bioengineered microgels for therapeutic angiogenesis</b>		41
Bastiaens, Philippe	Presenters: Scocozza, Bruno; Ghasemalizadeh, Farid	
<b>A synthetic morphogenic sensory system</b>		42
Bercowsky Rama, Arianne		
<b>Granularity and stochasticity of the segmentation clock</b>		43
Bojer, Mareike		
<b>Cellular utomata network model for cell differentiation</b>		44
Boon, Siaw Shi		
<b>Oncogenic role of human papillomavirus type 58 E7 variants</b>		45
Budjan, Christoph		
<b>Improving reproducibility of organoid technology by systematic and iterative screening approaches</b>		46
Chen, Chun-Ming		
<b>Using K18-EGFP/K8-CreERT transgenic mice to study organoid development across multiple organs</b>		47

Chernonosova, Vera	
<b>Assessment of functional status of HUVEC cells cultivated on the surface of natural and polyurethane-based supports by NGS</b>	48
Csikász-Nagy, Attila	Presenter: Pesti, Donát
<b>Understanding yeast co-culture interactions with the support of computational models</b>	49
Dagenais, Paule	
<b>The functional role of hydrodynamic forces in shaping the zebrafish caudal fin</b>	50
Damiati, Samar	
<b>From DNA to protein to synthetic membrane: a lipid-based sensor model</b>	51
Dastor, Margaux	
<b>A workflow for cell classifier gene circuits preclinical translation</b>	52
Dominguez, Alazne	
<b>Wnt positive feedback loop for reproducing Turing patterns in mammalian cells</b>	53
Dong, Bo	
<b>miR-4055 regulates ascidian sensory organ morphogenesis</b>	54
Fabian, Claire	
<b>Development of a lung organoid model to study fetal lung maturation</b>	55
Grant, Paul K	
<b>Interpretation of morphogen gradients by a synthetic bistable circuit</b>	56
Gregorio-Godoy, Paula	Presenter: Regueira, Marcos R
<b>A simple division of labour mechanism that drives homogeneous bacterial colonies to stationary de novo patterns</b>	57
Han, Ziyin	
<b>In vivo reconstitution of animal embryonic polarity network</b>	58

Hofmann, Roberto		
<b>Shedding light on developmental switches</b>		59
John, Alphy		
<b>A two-tier junctional machinery under the control of embryo cross-patterning drives coordinated tissue elongation and folding</b>		60
Kremser, Stephan		
<b>Controlling discrete pattern formation with local signals</b>		61
Kurihara, Daisuke		
<b>Live-cell analysis of female gametophyte development in Arabidopsis</b>		62
Laktionov, Pavel		
<b>General study and gene expression profiling of human primary endotheliocytes cultivated on different electrospun produced 3D matrices</b>		63
Lv, Zhiyi		
<b>Pseudo-epithelium of Drosophila syncytial blastoderm behaves like an elastic sheet</b>		64
Marcon, Luciano		
<b>Turing networks for patterning with equally diffusing signals</b>		65
Marin-Riera, Miquel		
<b>A 3D computer simulation of limb bud growth and elongation</b>		66
Mayr, Urs		
<b>Self-organization and symmetry breaking in intestinal organoid development</b>		67
Morel, Mathieu	Presenter: Bhati, Yash	
<b>Tissue-on-chip patterning by modular and gate gene circuits</b>		68
Morimoto, Mitsuru		
<b>Synchronized mesenchymal cell polarization toward epithelium shapes the trachea and esophagus</b>		69

Mosaffa, Payman <b>A hybrid cell-centred/vertex approach for modelling wound healing in <i>Drosophila</i> wing disc</b>	70
Muñoz, Jose <b>Three-dimensional mechanical analysis of embryonic tissue reorganisation and condensation</b>	71
Nachman, Iftach <b>Prediction and control of symmetry breaking in embryoid bodies by environment and signal integration</b>	72
Nahaboo, Wallis <b>Mesoderm morphology and migration mode are regionally regulated in the gastrulating mouse embryo</b>	73
Narayanan, Rachna <b>Do somites form in an embryo without a segmentation clock?</b>	74
Negrete Jr, Jose <b>Clocks and timers in embryo segmentation: a bottom up approach</b>	75
Núñez, Isaac <b>Engineering complex self-organized behaviors in cell populations growing on surfaces</b>	76
Ohzeki, Junichirou <b>Human artificial chromosome, as a platform for future gene circuit installation</b>	77
Pereira, Rúben <b>Molecular design of bioinstructive hydrogel bioinks support morphogenesis in 3D printed skin equivalents</b>	78
Perkins, Melinda Liu <b>Optogenetically simulated lateral inhibition generates contrasting patterns of gene expression</b>	79

Pernisova, Marketa		
<b>The role of cytokinins in the spatio-temporal regulation of organ initiation in phyllotaxis</b>		80
Popkova, Anna		
<b>Probing a role of acto-myosin network in cephalic furrow formation</b>		81
Regueira, Marcos R	Presenter: Daza-Garcia, Jesus	
<b>The multicellular incoherent feedforward loop: a novel intercellular motif for spatial pattern generation</b>		82
Serra, Tiziano		
<b>A sound-induced technology for multiscale organization of perfusable micro-vessels networks</b>		83
Serrano, Jose J		
<b>Information dynamics in self-organized bacteria structures</b>		84
Stapornwongkul, Kristina S		
<b>Engineering a long-range morphogen gradient</b>		85
Toda, Satoshi		
<b>Programming self-organizing multicellular structures with synthetic cell-cell signaling</b>		86
Tozluoglu, Melda		
<b>Differential growth rates determine positioning of folding in complex epithelia</b>		87
Van Der Hofstadt, Marc		
<b>Patterning cell cultures by self-organising biochemical landscapes</b>		88
Venzin, Olivier		
<b>Investigation of the coupling mechanisms driving the synchronization of the segmentation clock</b>		89
Vianello, Stefano		
<b>Altering geometry and mechanics to coax the development of self-organising embryonic organoids</b>		90

Zambrano Ramirez, Adrian	Presenters: Zambrano Ramirez, Adrian; Fracasso, Giorgio	
Bioinspired chemical processing in artificial cells		91
Zuzic, Marta		
Forward programming of photoreceptors from human induced pluripotent stem cells		92
