

Ahmad, Syed Farhan	
The functional perspective of B chromosomes and their role in understanding evolution of genome	45
Aibar, Sara	
Mapping cell types and gene regulatory networks in the Drosophila brain using single-cell transcriptomics and epigenomics	46
Almazán, Alba	
Restoring cell-type diversity in regenerated adult limbs: a single-cell approach in the crustacean <i>Parhyale hawaiiensis</i>	47
Andrews, Tallulah	
Dangers of imputing single-cell RNA-seq data.	48
Antoniou-Kourouniotti, Melissa	
Investigating the role of a Bmp2/Wnt3a/Smad1 signalling network in cardiac progenitor cell migration	49
Asai, Mone	
Generation of mice-chick chimeras for the study of the identity of the cell type	50
Banisch, Torsten	
Single cell RNA sequencing during gonadogenesis reveals novel cell populations and a soma-germline communication module in <i>Drosophila</i>	51
Bertucci, Paola	
Peripheral Neurons and Migratory Pigment Cells Emerge From the Multipotent Neuroectodermal Border in the Marine Annelid <i>Platynereis dumerillii</i>.	52
Bykov, Aleksandr	
Dissecting transcriptional developmental histories with single-cell resolution in <i>C. elegans</i>	53
Carelli, Francesco Nicola	
Evolution of the <i>Caenorhabditis</i> germ line transcriptional network through transposable element co-option	54

Chavan, Arun	
Diversification of tissue-resident macrophage types	55
Coolen, Marion	
Evolutionary variations in neural progenitor identities in teleost species	56
Correia, Sandra	
Embryogenic competence acquisition in tamarillo – from tissue to single-cell based analysis	57
D'Elia, Kristen	
Ancient transcription factors, Evi1 & Prdm16, define motor neuron identities	58
Duruz, Jules	
Acoel single-cell transcriptomics to study the evolution of bilaterian cell types	59
Erkenbrack, Eric	
Ancestral state reconstruction of regulatory genes underlying cell type identity of the echinoderm larval skeletogenic cell	60
Erkenbrack, Eric	
The role of autophagy in the evolution of the decidual stromal cells of eutherian mammals	61
Feregrino, Christian	
A Single-cell Transcriptomic Atlas of the Developing Chicken Limb	62
Flames, Nuria	
Epigenetic factors restrain serotonergic fate in <i>C. elegans</i>.	63
Göhde, Ronja	
Reconstructing the evolutionary origin of synaptic protein complexes	64
Goyal, Yogesh	
Mapping transiently plastic cellular states to drug-induced reprogrammed states in cancer	65

Guzman, Christine	
Functional and Structural Analyses of Neurexin-Mediated Synaptic Adhesion Complexes in Early Branching Animals	66
Haeussler, Maximilian	
The UCSC Single Cell Browser	67
Hentrich, Klaus	
Miniaturization and automation of CEL-Seq2 and SMART-Seq2 using the mosquito liquid handler	68
Herchcovici Levy, Sapir	
Linking Cell Cycle and Transcriptional Heterogeneity with Lineage Specification	69
Hochane, Mazène	
Capturing cell type diversity in the human fetal kidney by single-cell transcriptomics	70
Hulett, Ryan E.	
Neural cell-type diversity in the acoel <i>Hofstenia miamia</i>	71
K, Harini	
Regulation of cell size by a metazoan specific phosphoinositide kinase	72
Kleshchevnikov, Vitalii	
Inferring Pareto tasks using the geometry of single cell transcriptomes reveals patterns of cell-cell interactions	73
Kraus, Daniel	
Single cell expression analysis during regeneration of <i>Xenopus laevis</i>	74
Lane, Robert	
Epigenetic and Mitotic Contributions to Olfactory Neuronal Cell Homeostasis	75
Laura, Vibert	
An unconventional case for neural fate acquisition : in vivo dynamics of natural reprogramming event using single-cell transcriptome analysis.	76

Li, Ruili	
Germ cell development in cryptorchid testes during first 18 month of life	78
Lipovsek, Marcela	
Temporal heterogeneity of dopaminergic neurons	79
Liu, Jialin	
Histone modifications confer the robustness of phylotypic stage to stochastic and genetic variations on gene expression	80
Lohmann, Ingrid	
The Hox Transcription Factor Ubx stabilizes Lineage Commitment by Suppressing Cellular Plasticity	81
Lozada-Chávez, Irma	
Defining and testing complex multicellularity with developmental and genomic features potentially boosting the number of cell types	82
Luo, Yi-Jyun	
Single-cell transcriptomics of the acoel Hofstenia reveals the evolution of bilaterian cell types and stem cell regulation	83
Mahfouz, Ahmed	
Predicting cell populations in single cell mass cytometry data	84
Maier, Esther	
Transcriptional control through the chromatin-modifier Dot1l and its role in nervous system development	85
Makashov, Andrei	
Oncogenes and tumor suppressor genes participate in the origin of new cell types concurrently with differentiation genes	86
Matyunina, Ekaterina	
Fish Tumor Specifically Expressed, Evolutionarily New (TSEEN) Genes	87

McGarvey, Alison		
Profiling the chromatin landscape of zebrafish development at a single cell level with sci-ATAC-seq		88
Munsterberg, Andrea		
Advanced genomics to characterize cell lineage commitment in vertebrate somites		89
Papadopoulos, Nikolaos		
MERLoT and PROSST: reconstructing and modelling lineage trees for single-cell RNA-seq experiments		90
Quintana-Urzainqui, Idoia		
Tissue-Specific Actions of Pax6 in Murine Developing Forebrain Are Foxg1 Dependent		91
Razy, Florian		
Oral contributions from both neural and anterior placodal ectoderm in <i>Ciona robusta</i>		92
Robertson, Helen		
Uncovering cell type diversity in <i>Xenoturbella bocki</i> using whole organism single cell sequencing		93
Romanova, Daria		
Ultrastructural Atlas of Cell Types in Placozoa: Insights from <i>Hoilungia hongkongensis</i>		94
Sachkova, Maria Y.		
Understanding the evolution of nervous systems through studying synaptic proteomes in non-bilaterian metazoans		95
Schinzel, Friedrich		
Ontogeny of inhibitory auditory brainstem neurons		96
Sigaeva, Alina		
Nitric oxide-dependent intercellular communication		97
Soto Àngel, Joan Josep	Presenter: Nordmann, Eva-Lena	
Stable laboratory culture system of the ctenophore <i>Mnemiopsis leidyi</i>		98

Stamper, Erica		
Frequent evolutionary repurposing of enhancers across mammalian tissues		99
Steinheuer, Lisa		
Alleviating sparsity on scRNA-seq data using imputation approaches to unmask gene correlation structures		100
Stemmer, Manuel		
Neuronal cell type diversification in African cichlids with different brood care strategies		101
Stricker, Stefan		
Targeted removal of epigenetic barriers during transcriptional reprogramming		102
Tinarelli, Federico		
Altered loading of MCMC2-7 in G1 phase affects origin licensing in different cell types of Meier-Gorlin developmental syndrome		103
Tournière, Océane		
The POU domain transcription factor NvBrain3 is required in the differentiation of neural cells in Nematostella vectensis		104
Wollesen, Tim		
Single-cell rna-sequencing reveals molluscan cell types and sheds light on the evolution of a complex bilaterian body plan		105
Wong, Eunice		
Does the molecular foundation of aneural sensory behavior in sponge provide insights into the origin of nerve cells?		106
Zhuk, Oleksandr	Presenter: Shablii, Volodymyr; Zhuk, Oleksandr	
Endogenous retroviral env genes and their expression during embryogenesis in the oviparous Gallus gallus		107
