

Abagnale, Giulio		
Highly multiplexed nanoscopy for analysing biological systems across scales		52
Albecka-Moreau, Anna		
Imaging aspects of chromatin regulation by MORC2		53
Albert, Marvin		
An atlas for in toto mapping of signalling activity and morphological phenotypes		54
Al-Khatib, Laila		
Characterisation of the mechano-chemical relationship between actin and microtubule cytoskeletons and the active motion of cytoplasmic components		55
Arnsparng Christensen, Eva	Presenter: Andersen, Camilla	
The characterization of the spatio-temporal dynamics of Aquaporin-2 using photoactivated localization microscopy and spatiotemporal image correlation spectroscopy		56
Aslanoglou, Stella		
Cellular deformations induced by vertically aligned silicon nanowire arrays facilitate gene delivery		57
Bär, Julia		
Positioning of secretory organelles in dendrites: Focus on F-actin		58
Barbieri, Liliana		
CalQTrace: Simultaneous Calculation and Quantification of 100,000 immune activation Traces at single-cell resolution using CNN		59
Barbiero, Martina		
Towards measuring in vivo reaction kinetics during mitosis with FCS		60
Barentine, Andrew		
3D Multicolor Nanoscopy at 10,000 Cells a Day		61

Barry, David	
GIANI: Open-source software for automated analysis of 3D microscopy data	62
Barth, Roman	
Unifying chromatin structure and dynamics by super-resolution imaging	63
Bastos, Ricardo	
Accessible Single-Molecule Imaging at your fingertips	64
Basyuk, Eugenia	
Visualization of heterochromatin transcription in Drosophila	65
Bates, Mark	
Three dimensional architecture of the Nuclear Pore Complex visualized with light	66
Bevilacqua, Carlo	
Imaging mechanical properties of living organisms in 3D using Brillouin microscopy	67
Biermann, Barbara	
Imaging intra- and extracellular neurotransmitter receptor dynamics at the nanoscale	68
Breimann, Laura	
Mechanism of transcription repression by an X-specific condensin in C. elegans	69
Brejchova, Jana	
Mobility of delta opioid receptor in plasma membrane determined by novel method of FRAP analysis	70
Brodská, Barbora	
Implications of nucleophosmin mutations on its oligomerization in living cells	71
Brown-Harding, Heather	
Visualizing Chlamydia Development at a Single Bacterium Level	72

Bucevicius, Jonas	Presenters: Lukinavicius, Grazvydas; Bucevicius, Jonas	
Rhodamine–Hoechst positional isomers for highly efficient staining of heterochromatin		73
Carlón-Andrés, Irene		
Multi-parameter Single Molecule Spectroscopy Imaging Reveals Intra and Inter Molecular Conformations of HIV-1 Envelope on Native Viruses		74
Cavka, Ivana		
Mapping positions and orientations of novel components of the synaptonemal complex in <i>Caenorhabditis elegans</i> meiosis by 3D-single molecule localization microscopy		75
Chen, Antony		
Novel molecular beacons for live-cell imaging of single RNA transcripts and genomic loci		76
Chiang, Hsiao-Ju		
HySP Hybrid Unmixing: Predicting, compressing and unmixing fluorescent signals		77
Clarke, David T.		
10 nm-resolution fluorescence microscopy at cryogenic temperatures: Challenges, opportunities, and the road to CLEM		78
Cosco, Emily	Presenters: Lingg, Jakob; Arús, Bernardo	
Multicolor, real-time in vivo imaging with tunable shortwave infrared polymethine dyes		79
Cserép, Gergely Balázs		
Inherently fluorogenic dienes for bioorthogonal labeling schemes		80
Culley, Sian		
Automated circle and ellipse detection in ImageJ using CHough		81
Czuchnowski, Jakub		
All-optical photoacoustic tomography for deep tissue imaging		82

Daetwyler, Stephan	
Content-guided multi-photon scanning microscopy	83
Das, Rashmita	
Thermo-gated ion channel TRPV4 and its mutants causing skeletal dysplasia in human reveals altered interaction pattern with cholesterol as revealed by high-end imaging	84
Davis, Felicity	
Multiscale activity imaging in mammary gland reveals how oxytocin enables lactation	85
De Henau, Sasha	
Localized Mitochondrial Redox Signaling Promotes Symmetry Breaking of the <i>C. elegans</i> Zygote	86
Deckers, Thomas	
Automated monitoring of cell growth kinetics of heterogeneous adult progenitor cell populations using lens-free imaging microscopy	87
Dekkers, Johanna F.	
3D imaging reveals effective killing of breast tumor organoids by engineered T cells at a single cell level	88
Delbart, Florian X.	
Insights into the cellular organization of polyketide synthase assembly lines.	89
Descloux, Adrien	Presenter: Grussmayer, Kristin
Parameter-free image resolution estimation based on decorrelation analysis	90
Dey, Gautam	
Closed mitosis requires local disassembly of the nuclear envelope	91
Dias-Ferreira, Eduardo	
Toward a systems-level understanding of quantitative reward prediction in <i>Drosophila</i>	92

Diekmann, Robin		
Haste makes waste – Slow imaging increases resolution and labeling efficiencies in SMLM		93
Dong, Congcong		
Interferogenic Synapse forms at cell contact of plasmacytoid dendritic cells and infected cells for a targeted control of viral replication		94
Dudka, Wioleta		
Description of Tunneling Nanotubes structure using ssCLEM tomography		95
Dukic, Barbara		
Mild heat stress-induced early cellular events in mammalian cells		96
Dumont, Vincent		
Studying the role of PACSIN2/syndapin 2 in nephrin trafficking and actin cytoskeleton regulation in diabetic kidney disease using light and electron microscopy		97
Dunsing, Valentin		
Direct quantification of protein interactions and dynamics at cell-cell adhesion sites via fluorescence fluctuation spectroscopy		98
Dušková, Lucie	Presenters: Dušková, Lucie; Hujnáková, Martina	
LDLR variants in the beta-propeller subdomain and their effect on the protein maturation and unfolded protein response activation		99
Eklund, Alexandra		
Design and application of DNA nanostructures for templating of receptor-ligand interactions in single cells		100
Fam, Kyong Tkhe		
Gemini-561/o-Coral fluoromodule: A bright and photostable genetically encoded labeling system for live-cell RNA imaging		101

Fellows, Alex		
Investigating the role of dynein in neuronal trafficking		102
Filimonenko, Vlada V.		
Electron microscopic approaches in studies of lipidic structures in the cell nucleus		103
Flores-Rodriguez, Neftali		
Protein nano-organisation surveyed by GSD and STED microscopy		104
Fornasiero, Eugenio F.		
Visualizing brain and synapse protein turnover		105
Foster, Alexander		
Investigating Biogenesis of MCC/Eisosomes In Vivo		106
Francis, Rania		
High-throughput isolation of giant viruses using high content screening		107
Franke, Christian	Presenter: Glatzová, Daniela	
Imaging nanoscale organisation of CD4 at the plasma membrane of T cells		108
Frei, Michelle		
Photoactivation of silicon rhodamines via a light-induced protonation		109
Freudenblum, Julia		
Gal4ER/UAS-controlled tissue specific gene expression for mosaic labeling of pancreatic endocrine cells		110
Gagliardi, Paolo Armando		
Apoptotic epithelial cells trigger an ERK/Akt activity wave in the neighbors to protect them from apoptosis		111
Ganji, Mahipal		
Bacterially Derived Antibody Binders as Small Adapters for DNA-PAINT Microscopy		112

Garcia Lopez, Javier		
Rylene dyes: Photostable and tuneable fluorophores for labelling of biomolecules and polymers		113
Garcia, Beatriz		
Deep Learning Quality Control for High-Throughput High-Content Screening Microscopy Images		114
Ghosh, Shirsendu		
T-cell Microvilli as Activation Hubs		115
Godbole, Amod		
Monitoring activation of G-protein coupled receptors in living cells using functional biosensors		116
Golic, Igor		
Is H3s10ph suitable as a mitotic marker for quantifying brown adipocytes proliferation?		117
Gonschior, Hannes		
Nanoscale segregation of claudins regulates paracellular ion flux over tight junction		118
Gonzales Pisfil, Mariano	Presenter: Bayer, Mathias	
Scanning FCS and Super-Resolution Microscopy on 2D Lipid Membranes		119
Gorol, Hanna		
Ultrastructure of the midgut epithelial cells in some invasive polychaetes (Annelida, Polychaeta)		120
Götz, Ralph		
Visualization and quantification of plasma membrane receptors by super resolution microscopy		121
Govindaraj, Kannan		
Identifying sub-population of cells in human primary chondrocytes using transcription factor (TF-) FRAP		122
Gravastrand, Caroline	Presenter: Skjesol, Astrid	
FIP2 regulates E. coli-induced inflammatory cell death in human macrophages		123

Grousl, Tomas		
RACK1 mutant protein deficient in O-GlcNAc modification is not sequestered into stress granules		124
Grunwald, David	Presenters: Strambio De Castillia, Caterina	
Metadata and Performance Tracking for Fluorescent Microscopes II - MetaMax		125
Grußmayer, Kristin		
Spectral Cross-Cumulants for Super-resolved Multicolor Imaging		126
Gu, Lusheng		
Localizing Single Molecules with Interferometry		127
Gudmundsson, Sigurdur R.		
3D structure of the phagophore assembly site		128
Gunkel, Manuel		
Automated targeted multi-scale imaging of tissue microarrays for telomere analysis in prostate cancer		129
Haase, Robert		
CLIJ: GPU-accelerated image processing for everyone		130
Hager, Roland		
A micropatterning platform for the quantification of insulin secretion in β cells		131
Hajare, Holly		
Development of Saxitoxin-Based Probes for Imaging Voltage-Gated Sodium Channels		132
Hajdúchová, Dominika		
Pathophysiology of peripheral nervous system changes during parkinson`s disease development and progression		133
Haynes, Elizabeth		
Long term light-sheet imaging and axon arborization pattern profiling reveal mechanisms of neuronal morphogenesis		134

Heilemann, Mike	
Bleaching-insensitive STED microscopy with exchangeable fluorescent probes	135
Hernandez-Valdes, Jhonatan	
Phenotypic memory in the methionine uptake by an auxotroph bacterium	136
Hintze, Anika	
Ultrastructural changes that determine the development of a CNS synapse	137
Hirata Miyasaki, Eduardo	
25 Plane Multifocus Microscopy for Live 3D Imaging	138
Hoess, Philipp	
A new approach to reconstruct dynamics from static super-resolution images to study clathrin-mediated endocytosis	139
Hoffmann, Felix	
Identification of the Interactome of Intraflagellar Transport Proteins TTC30A/B and their Role in Ciliogenesis	140
Hu, Kevin	
Optimized single-molecule switching nanoscope for simultaneous multi-color imaging	141
Huck, Nicola	
Enable the (currently) impossible – automation for highspeed microscopy	142
Illichova, Hana	
A fluorescence microscopy approach to study the active phase of the NADPH oxidase	143
Imanishi, Ayako	
Real-time evaluation of ROCK activation by a Förster resonance energy transfer-based biosensor during vasospasm in living mice	144
Jähne, Sebastian	
A quantitative analysis of an average cultured neuron	145

Jahr, Wiebke		
Two-photon STED microscope for deep tissue nanoscopy		146
Jartseva, Aleksandra		
The role of HP1β in chromatin organization during the exit from naive pluripotency of mouse embryonic stem cells (mESCs)		147
Jurriens, Daphne		
Resolving the nanoscale organization of the dendritic microtubule network using expansion microscopy		148
Kadam, Ulhas		
Live cell imaging and dynamics of ectopically applied RNAs in plants		149
Karasev, Maksim		
Optogenetic control of endogenous proteins		150
Keuenhof, Katharina		
Quantifying Cellular Responses to Heat-Shock in Yeast Cells		151
Khurana, Sakshi		
Studying SOX9 transcriptional activity by TF-FRAP across cell types		152
Kiefer, Friedemann		
Intravital visualization of hypoxia		153
Kiyomitsu, Tomomi		
The development of mitosis-specific rapid protein-degradation assays in human cells		154
Klevanski, Maja	Presenter: Sass, Steffen	
Introducing an autonomous staining system capable of accelerated multiplex 3D super-resolution microscopy in cells and tissue		155
Kostina, Anna		
Nanoscale visualization of the inflammasome protein complex using super-resolution microscopy		156

Kostiuk, Georgij	
Single-molecule study of monomeric restriction endonuclease BcnI	157
Kraus, Felix	
Dynamin-related protein 1 is necessary and sufficient for division of mitochondria and peroxisomes	158
Kriel, Jurgen	
Inducing lethal autophagy in brain cancer – novel insights gained through microscopy	159
Kumari, Kamalesh	
Membrane homeostasis during exocrine secretion is maintained by membrane crumpling and sequestrations	160
Kundel, Franziska	
Multiplexed super-resolution microscopy in the early mouse embryo	161
Lambert, Talley J.	
FPbase: A community-editable fluorescent protein database	162
Landoni, Juan Cruz	
Regulation between Nucleotide Metabolism and the Mitochondrial Network and Genome	163
Laskaratou, Danai	
Short lifetime donor for minimal bleedthrough FRET applications	164
Lauritsen, Line	Presenter: Shuttle, Christopher
High resolution live cell basal membrane topography: Curvature sensing of membrane proteins	165
Le Dévédec, Sylvia	
High-content imaging of metabolism for drug discovery in cancer research	166
Le Marois, Alix	
Imaging drug resistance: using fluorescent biosensors and time-lapse microscopy to understand therapy response in EGFR-mutant lung cancer	167

Lee, Eunsoo	
High-Performance Acellular Tissue Scaffold Combined with Hydrogel Polymers for Regenerative Medicine	168
Lee, Ji Young	
Dynamics and ultrastructure of putative hepatitis C virus assembly sites and their spatial coupling to replication sites	169
Lehmann, Martin	
Nanoscale coupling of endocytic pit growth and stability	170
Lemcke, Heiko	
Analyzing the structural maturation of stem cell derived cardiomyocytes - A super resolution based approach	171
Leveque-Fort, Sandrine	
3D single molecule localization microscopy based on time modulated illumination	172
Leveque-Fort, Sandrine	
Combining 3D single molecule localization strategies for multicolor imaging	173
Li, Yuanyuan	
Study on The Relationship of Laser Power Density and Localization Precision in PALM Imaging	174
Lopes, Miguel M.	
Whole-Brain Analysis of Adeno-Associated Virus (AAV) Biodistribution with Single-Cell Resolution by Tissue Clearing and Light-Sheet Microscopy	175
Lu, Yunjiao	
Probabilistic overall reconstruction of membrane-associated molecular dynamics from partial observations in rod-shaped bacteria	176
Lukinavicius, Grazvydas	Presenter: Gerasimaite, Ruta
Actin imaging in living cells: molecular mechanisms behind beautiful pictures	177

Maffini, Stefano		
Electroporated recombinant proteins as tools for in vivo functional complementation, imaging, and chemical biology		178
Maglione, Marta		
Role of RIM-BP2 in synapse diversity revealed by super-resolution gSTED microscopy		179
Mahyad, Baharak		
Correlative imaging: A method to better understand T cell decision-making		180
Marin, Zach		
Extracting organelle membrane topology from super-resolution microscopy data		181
