Investigating the role of mTORC1 in the regulation of gene expression		45
Alarcon, Pablo		
Participation of purinergic receptor P2X1 in Neutrophils Extracellular Traps formation induced for NEFAs		46
Alvarez de Prax, Marisa Claudia		
Metabolomic profiling of the polyphenol quercetin response in leukemia cell lines		47
Andrade, Jorge		
Control of endothelial quiescence by FOXO-regulated metabolites		48
Artibani, Mara		
Exploiting the metabolic vulnerabilities of chemotherapy-resistant ovarian cancer		49
Barnert, Andrea		
The Role of Bcat1 and the Branched Chain Amino Acid Metabolism for Pluripotency in Mouse Embryonic Stem Cells		50
Beltrán-García, Jesús		
Extracellular histones induce endothelial pyroptosis through NLRP3 inflammasome mediating endothelial immunometabolic dysregulation and dysfunction		51
Beuchel, Carl		
Clinical and life-style related factors influencing whole blood metabolite levels – a comparative analysis of three large cohorts		52
Bochkis, Irina		
Hdac3, Setdb1, and Kap1 mark H3K9me3/H3K14ac bivalent regions in young and aged liver		53
Bolin, Anaysa		
Two-Mirna signature for brown adipose tissue response to glucocorticoids		54
Borbinha, Jorge		
Metabolic Reprograming during Zebrafish Caudal Fin Regeneration		55

Braun, Yannick Linking epigenetic signature and metabolic phenotype by investigating mitochondrial properties in high grade gliomas	56
Brunton, Holly HNF4A and GATA6 Loss Reveals Therapeutically Actionable Subtypes in Pancreatic Cancer	57
Buelens-Sleumer, Laura Epigenetic regulation in food allergy	58
Burgos, Rafael A. D-lactate induces glycogen degradation and neutrophil extracellular traps (NET) via PI3K and GSK-3β activation	59
Byun, Won Seok Epigenetic mechanisms for AMPK isoform expression on the glucose metabolisms in skeletal muscle cells	60
Cadenas, Cristina Epigenetic and transcriptional profiling identifies impaired glyoxylate detoxification in non-alcoholic fatty liver disease as a risk factor for hyperoxaluria	61
Casani, Salvador Metabolic changes control the epigenetic regulation of the Yeast Metabolic Cycle	62
Chen, Chia-Lin Arginine acts as an epigenetic regulator to modulate mitochondrial functions	63
Church, Michael Swi-Snf is a regulator of the methionine biosynthetic pathway in <i>Saccharomyces cerevisiae</i>	64
Contreras, Raian E. Histone deacetylases 5 regulates long-term hypothalamic transcriptional programs	65

Dahn, Margaret		
Genome-wide knockdown screen and metabolomic analyses identify folate-dependent and folate-independent responses to DNA de-methylating therapy in breast cancer	66	
Dallons, Matthieu		
Contribution of in vitro 1H-NMR metabonomics for studying doxorubicin-induced cardiotoxicity and protective effects of dexrazoxane	67	
Demetriadou, Christina		
Epigenetics meets metabolism through histone acetyltransferase NAA40	68	
Dumbell, Rebecca		
Investigating enhancer activity of a fine-mapped WARS2-TBX15 GWAS locus associated with waist-hip ratio	69	
Fan, Qiong	Presenters: Fan, Qiong; Sæther, Thomas	
LXRalpha interacts with the glucose-sensing transcription factor ChREBPalpha to regulate its transcriptional activity	70	
Fernandez-Rojo, Manuel Aleja		
Depletion of methionine regulates plasma membrane proteins	71	
Ferraz-Bannitz, Rafael		
Differential metabolic profile in subjects with neuroglycopenia after gastric bypass surgery	72	
Finke, Daniel		
Epigenetic memory of metabolic stress in the heart - Identification of a persistent enhancer activation	73	
Font Cunill, Berta		
High-throughput screen to identify cis-regulatory elements of HNF1A	74	
Friedl, Antonie		
Allergen training alters macrophage immunometabolism and inflammatory response	75	

Gall Trošelj, Koraljka	Presenter: Mojzeš, Anamarija	
Epigenetic regulation of NRF2-NQO1 axis in human head and neck-originating cancer cell lines and untransformed fibroblasts exposed to nutritional stress		76
Garai, Pramita		
Co-regulation of Ergosterol and GPI-anchor biosynthesis by epigenetic regulator Rtt109 in <i>Candida albicans</i>		77
Garbowicz, Karolina		
Inhibition of cysteine uptake as a therapeutic concept for MYCN/MYC-driven tumors		78
Gavriil, Marios		
2-Hydroxyglutarate as a Regulator of Chromatin and Gene Expression		79
Gemünd, Ioanna		
Long-term adaptation in fatty acid primed monocytes		80
Gondáš, Eduard	Presenter: Murín, Radovan	
The synthesis of ketone bodies by human astrocytes		81
Gopal, Priya Darshini		
Targeted epigenetic remodelling of metabolic targets through the modulation of PI3K/AKT/mTOR pathway by Rab proteins in Breast cancer		82
Gopalakrishnan, Swetha		
Connecting the dots: Muscle stem cells, Mitochondria and Metabolism		83
Grosche, Sarah		
Uncovering nuclear metabolite retention mechanisms		84
Guberovic, Iva		
A conserved role of macroH2A1.1 histone variant in regulating nuclear NAD⁺ metabolism from protists to humans		85
Guhathakurta, Sukanya		
Role of MOF acetyl transferase in mitochondrial homeostasis		86

Guillen, Hector Identification of DNA-binding proteins in promoter regions using HyCCAPP	87
Hietakangas, Ville Transcription factor Clockwork orange coordinates amino acid balance in response to sugar feeding	88
Hor, Kahyee Maternal obesity and hyperglycaemia is associated with perturbation of glucose metabolism and DNA methyltransferases in offspring brain in a sex-dependent manner	89
Hörnblad, Andreas Genome-wide analysis of differential gene expression in diet-induced obese mice treated with PAN-AMPK activator O304	90
Hsieh, Wen-Chuan Mechanism of Activation of Genes Required for Energy Metabolism	91
Hu, Chun-Mei Epigenetic alteration by reprogramming succinate and fumarate levels promotes tumorigenesis and metastasis in pancreatic ductal adenocarcinoma	92
Huang, Tsung-Yen Analysis of immunomodulatory pathways and metabolism involved in Th17 pathogenicity	93
Jun, Ji Hye Up-regulated sterol regulatory element binding proteins by placenta-derived mesenchymal stem cells inhibit adipogenesis in a rat model with bile duct ligation	94
Kerr, Bredford High Fat-Low Carb diet induces neural plasticity-related modifications associated with changes in epigenetic factors in the hypothalamic arcuate nucleus of mice	95
Khalili, Bitá Automated analysis of large-scale NMR data generates metabolomic signatures and links them to candidate metabolites	96

Khan, Haris		
A Creb3-Like transcription factor regulates feeding behavior through the early secretory machinery genes		97
Kim, Da Jung		
Metabolomic profiling of microbe-derived extracellular vesicles in patients with gastric cancer		98
Kim, Jeong-Min		
The inhibition of MicroRNA 466bf Neurological recovery in a rat intracerebral hemorrhage model by activating Insulin-like growth factor pathway		99
Kim, Kyung-Sup	Presenter: Koh, Eunjin	
Hypoxia-mediated downregulation of mitochondrial pyruvate carrier (MPC) through interplay with Notch signaling pathway prevents cancer cells from hypoxia-induced apoptosis		100
Kirchmaier, Ann		
Tolerance of DNA replication stress is promoted by fumarate through modulation of histone demethylation and enhancement of replicative intermediate processing		101
Koufaris, Costas		
Metabolomic investigation reveals widespread metabolic effects of the histone modifier N-terminal acetyltransferase NAA40		102
Kuo, Tia Tyrsett		
The diverging roles of cryptochromes in response to genomic insults		103
Landgrave-Gomez, Jorge		
Acetyl coxylase alpha the rate-limiting enzyme of lipid biosynthesis regulates chromosome segregation		104
Lee, Hanteo		
Ctbp2 regulates epigenetic status by sensing metabolic changes		105
Lee, Sangho		
Cabin1 derived short peptide selectively inhibits Calcineurin-NFAT pathway		106

Li, Kai-Chun		
Membrane transporters talk to chromatin: The role of SLC proteins in BRD4-mediated epigenetic plasticity		107
Li, Lingzi		
Uncovering transcriptional reprogramming of pancreatic alpha-cells during development of insulin resistance		108
Li, Xiang		
The interplay between energy metabolism and epigenetics regulates heart regeneration and remodeling		109
Li, Xiaoling	Presenters: Li, Xiaoling; Fang, Yi	
Metabolic and Epigenetic Regulation of Stem Cell Differentiation		110
Lin, Jung-Ming		
Unravelling the link between impaired folate metabolism and adenine dependence		111
Llinàs-Arias, Pere		
Epigenetic silencing of SVIP contributes to cancer cell metabolic reprogramming		112
Maher, Michael		
Epigenetic-transcriptional regulation of fatty acid metabolism and its alterations in Leukemia		113
Mancio, Liliana		
Host metabolism regulates malaria infection		114
Manosalva, Carolina		
D-lactic acid increases the production of IL-6 and IL-8 in bovine fibroblast-like synoviocytes (bFLS)		115
